## How to go about taking the Cisco Certified Network Associate (CCNA) Test

### **TEST BASICS:**

Test 640-607 Cisco Certified Network Associate (CCNA)  
Cost \$125 (50% off voucher is available to Networking Academy students who pass all four semester finals the first time around with a 70% or better.)  
Scoring: 300-1000 points. 849+ is passing  
Time: 75 minutes (I found this to be more than ample time)

The Cisco Certified Network Associate Test is administered by authorized Prometric and Virtual University Enterprises (VUE) testing centers. The closest locations are as follows:

<b>PROMETRIC</b>	<b>VUE</b>
2947 Eyde Parkway 2 <sup>nd</sup> Floor East Lansing, MI 48823 517-318-4005-X1600 <a href="http://www.2test.com">http://www.2test.com</a>	Computer Data, Inc 3899 Okemos Road Suite B Okemos, MI 48864 517-349-6794 <a href="http://www.vue.com">http://www.vue.com</a>

### **WHAT TO EXPECT:**

About half of your questions will simply require you to read a question or statement and select the best answer.

Most of the rest of the questions will require you to read a question or statement and select multiple correct answers. (It always tells you how many choices are correct.)

You may get a few interactive questions which require you to match up things, enter router commands in sequence, or review an exhibit and select the best answer.

### **PASSING:**

If, at the end of your test, it asks you if you are over 18 or not, you have most likely passed. The reason they ask is that if you are under 18 Cisco will not issue certification without written authorization from a parent or legal guardian.

### **SUGGESTIONS:**

Arrive at the testing facility early. If they are not particularly busy, they might let you start early, or will certainly allow you to review up until your scheduled time. You will be given paper and pencil to use during the examination period.
