

Lansing School District

RECOMMENDED C.C.N.A. PREPARATION MATERIALS

Note: There are many good resources that are not listed on this page. As long as the product you are considering says that it is for the Cisco Certified Network Associate Exam #640-507 it will cover basically the same things you will learn in the Cisco Networking Academy.

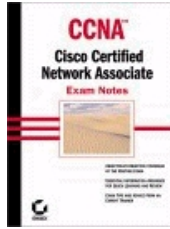

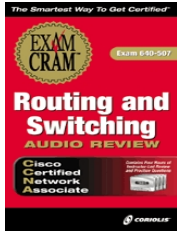

STUDY GUIDES:

	<p>Sybex CCNA Study Guide</p> <p>\$39.99*</p> <p>Very in-depth coverage of everything you will study in class. Comes with practice test software, subnet and wildcard calculator and more.</p>
	<p>Cisco Press Study Guides</p> <p>\$49.95</p> <p>Also has very in-depth coverage of everything you will study in class. Complete with practice test and other bonus software.</p>

PRACTICE TESTS:

	<p>C.C.N.A. Transcender</p> <p>\$179.00</p> <p>Offers three complete practice tests. Test feedback tells you what areas you need to improve upon before taking the CCNA.</p>
	<p>Boson CCNA Practice Tests</p> <p>\$29.95 Per Test (3 Available)</p> <p>Also a very good test preparation program. Significantly cheaper than Transcender, but does not online your weak areas.</p>

SUMMARIES: (similar to Cliff Notes or Spark Notes)

	<p>Sybex CCNA Exam Notes.</p> <p>\$19.99</p> <p>This is by far the best resource I used to prepare for the C.C.N.A. It is a novel sized, paperback book that goes perfectly with the Sybex Study Guide.</p>
	<p>ExamCram CCNA Audio Review</p> <p>\$39.99</p> <p>An Audio Book all about CCNA. 3 hours of lessons and 1 hour of practice questions. A Great way to review what you already know.</p>

FREE RESOURCES:

	<p>http://ExamNotes.net</p> <p>Excellent online and printable summary .</p>
	<p>http://ExamCram.com</p> <p>Free Question of the Day emails. Free practice Tests.</p>
